## About Me

I am a motivated final-year software engineering undergraduate. I have a passion for ensuring software quality and optimizing user satisfaction. I am always willing to learn new technologies and improve my skills. I am eager to contribute to collaborative teams and gain practical experience in the field of Quality Assurance.

## Education

- BSc Hons in Software Engineering**  
2020 - Present  
SLTC Research University  
**Current GPA- 3.32**
- Advanced Level Examination**  
2018  
Southlands College Galle  
Physical Science Stream + ICT

## Projects

- Petvet Service**  
**2023 - Present**  
**Veterinary Management System**
  - Veterinary clinical management system for veterinary staff, and client management.
  - Using this clients can book their appointments, and check the availability of the doctors.
  - Technologies used: React, Node JS, Express JS, MongoDB
  - I am still contributing to developing the front end. Hope to contribute to developing the backend soon.

## Personal Skills

### Teamwork

### Problem Solving

### Project Management

### Communication

### Adaptability

### Responsibility

## Reference

### Mr.Dileepa Fernando

Senior Lecturer

School of IT and Computing

SLTC Research University

Email: dileepaf@sltc.ac.lk

### Ms.Saraji Hewagamage

Visiting Lecturer

School of IT and Computing

SLTC Research University

Email: sarajih@sltc.ac.lk

## Projects

### 2022 Oct -2023 Jan

#### Pharmacy Hubweb Application

- In our project, we provide a centralized platform where people can view or buy products from multiple pharmacies without travelling and finding pharmacies nearest to their current location.
- Used Technologies: HTML, CSS, Javascript, Firebase, Java.

### 2021 Jun -2021 Dec

#### Ceylon Tea Cloud

- Tea harvest management system to make the connection comfortable between the tea factories of Sri Lanka and the growers by introducing a web application.
- By using our web application factory can manage the tea growers' records, generate reports, and manage their monthly salaries.
- Manage the factory staff using this, and tea growers can request fertilizers, and tea products through our web application.
- Used Technologies: HTML, CSS, Javascript, PHP, MySQL
